PRODUCTS MADE BY UPCYCLING CROP-WASTE

We prioritize the only planet we have, our earth!

Our high-quality products are crafted from sustainable bio-composites made with responsibly sourced crop residues like coffee husk, rice husk, rice straws, bamboo husk and more. Plus, they're designed with circularity in mind.

“Nature's wonder material, **Bamboo**, grows incredibly fast, outpacing all other plants in CO2 absorption. As strong as steel, it offers an eco-friendly alternative with the lowest carbon footprint when used in manufacturing of various products.”

“The aroma of freshly brewed coffee is a surefire way to start the day feeling energized. But it doesn't stop there. Thanks to innovative uses of **coffee husk**, you can enjoy your morning cup knowing it's a sustainable choice. It's a win-win for your health and the environment!”

“Rice, a nutritious and widely consumed grain, is a global staple food. By using products made from **rice husks & straws**, we can help farmers avoid crop burning, a harmful practice for our planet.”
