# DONE WITH YOUR FOOD?!

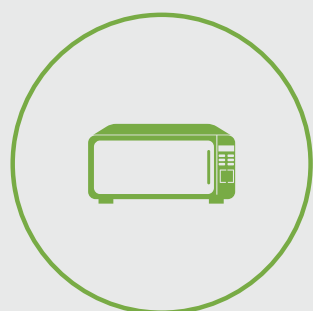

These eco-friendly plates are made entirely from natural ingredients you can see right in the texture – rice bran, rice husk, and wheat flour. We skip all the artificial extras like linings, coatings, and glue, ensuring they're safe for you and the planet.

Plus, they're completely animal-friendly. If our plates are mistakenly thrown in any land or water bodies, animals can eat them without being harmed.

Here's the real kicker: These plates are champions of biodegradability. In just 30 days, they'll break down naturally, leaving no harmful microplastics or waste behind. So you can enjoy worry-free entertaining while minimizing your environmental impact.
